SUMMARY

Frontend developer with practical experience building responsive web applications using JavaScript, React.js, Next.js and Tailwind CSS. Develops projects independently with a focus on clean interfaces, component-based architecture, usability and real-world business applications. Experienced with Git/GitHub, data-driven applications and Supabase/PostgreSQL, with additional professional experience providing technical support and maintaining IT systems across enterprise environments. Quick to learn unfamiliar technologies and comfortable working independently as well as within technical teams.

EDUCATION

Kabete National Polytechnic, Nairobi

Diploma in Information Communication Technology, Relevant coursework: Programming, Networking, Systems Analysis & Design, Data Management and Applied Project Work.

May 2023 – August 2025

EXPERIENCE

ICT Maintenance Support Technician

2024 – 2025

Fincom Africa

On-site at BAT, EABL & East Africa Maltings

Contract

- Performed operating-system upgrades and reinstalls across staff machines at three enterprise sites, with zero reported data-loss incidents.
- Diagnosed and resolved hardware faults, including component replacements, repairs and general IT support issues.
- Provided direct technical support to end users at BAT locations in Nairobi and Thika, EABL HQ and East Africa Maltings.
- Investigated recurring technical issues and addressed root causes to reduce repeat support requests.
- Communicated technical solutions clearly to users with varying levels of technical knowledge.
- Worked within enterprise environments where reliability, troubleshooting and minimal disruption were important.

PROJECTS

EaziWage — Payroll & HR Management Platform | Next.js, React, TypeScript, Tailwind CSS, Supabase/PostgreSQL

- Developing a business-focused web application for payroll and HR management.
- Building responsive interfaces for managing employee and payroll-related workflows.
- Working with relational data and database-backed application functionality using Supabase/PostgreSQL.
- Applying authentication, database policies and structured application architecture to a real-world business use case.

SkillsConnect — Peer-to-Peer Skill-Sharing Platform | React, Next.js, Tailwind CSS

- Built a responsive web platform focused on connecting users around skills and knowledge sharing.
- Developed reusable frontend components and interactive user interfaces.
- Applied responsive design principles to support different screen sizes and user experiences.

Autoflex — Vehicle Management System

- Developed a web application for managing vehicle records and servicing information.
- Designed interfaces around structured data and practical management workflows.

Additional UI/UX Projects — Blog Platform, Mojito & Safari

- Built interactive web experiences exploring responsive layouts, component design, animation and modern interface patterns.
- Used these projects to strengthen frontend development and UI/UX skills.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Development

Development: Git, GitHub, REST/API-based application development, Form Handling, Debugging, UI/UX

Backend & Data: Supabase, PostgreSQL, Database Design

Tools: VS Code, Vercel
